

# AnyData

## Customer Profile

Inmarsat plc (LSE: ISAT) is a British satellite telecommunications company, offering global mobile services. It provides telephone and data services to users worldwide, via portable or mobile terminals which communicate with ground stations through twelve geostationary telecommunications satellites.

## The Need

Inmarsat required support for a project to cleanse Vendor Master Data in SAP. Vendors were de-duplicated and validated using Dun and Bradstreet information.

## The Solution

Using AnyData's Supplier On-Boarding solution, Inmarsat automated data cleansing with custom email questionnaire template that managed and verified supplier responses in real-time.

## AnyData® Supplier On-Boarding simplifies supplier and compliance data management for Inmarsat.

As new government regulations come into force, effective Supplier On-Boarding (also known as 3rd Party On-boarding) is an essential element for all organisations. Supplier On-Boarding's relevance is no longer limited to just Procurement and Finance, its growing importance also applies to Compliance and Legal functions.

Using AnyData's carefully defined automated process, Inmarsat were able to securely send tailored questionnaires requesting information to be verified and corrected via a secure Self-Service portal using a series of bulk email campaigns.

As a result of these campaigns, Inmarsat was able to monitor, respond and approve supplier responses in real-time for feedback into SAP.

The AnyData® Supplier On-Boarding solution allowed Inmarsat to implement quickly with almost no additional coding, making it easy to update data and its integration with third party data from Dun and Bradstreet provided confidence the correct information was being collected.

1/2 >

*“The Anydata software was simple and intuitive meaning we were able to contact several hundred suppliers in one go and they were easily able to amend and assure the data without any support or additional resource on our side. The end result for Inmarsat was improved data and supplier participation beyond our initial expectations and all at an affordable cost.”*

Gary Salterpicco MCIPS MICRS, Procurement Governance and Compliance Lead Inmarsat Global

## Benefits of AnyData's 3rd Party On-Boarding Solution

### Improve Data Quality

- Supplier Self-Service Portal
- Discover, correct and validate compliance data in real-time

### Provide Better Visibility

- Easy to create and change Compliance Questionnaires
- Real-time interactive dashboards

### Improve Supplier Relationships

- Making it easy for suppliers to do business with you
- Paper free and update Questionnaires on demand

### Mitigate Risk

- Automatically identify risks
- Ensure appropriate level of due diligence

### Ensure Compliance

- Tailored approach to ensure compliance with internal policies and external regulations
- Automated checks with third party databases
